Entry-level AI and Data Science professional with a BCA and hands-on experience in data analytics, machine learning, deep learning, NLP, Generative AI, LLM applications, RAG, and model deployment. Skilled in Python, SQL, statistics, predictive modeling, neural networks, prompt engineering, and production-oriented APIs.

TECHNICAL SKILLS

Languages & Data

Python, SQL, Pandas, NumPy, Statistical Analysis, EDA

ML & Deep Learning

Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, CNN, Computer Vision, OpenCV, Feature Engineering

NLP & Generative AI

NLP, LLMs, Generative AI, Agentic AI, Prompt Engineering, RAG, LangChain, OpenAI API

Deployment & Tools

Streamlit, Flask, REST APIs, Tableau, MySQL, Git

EXPERIENCE

Data Science Trainee

Apr 2026 – Dec 2026

Naresh i Technologies

- Completed structured training in Python, statistics, data cleaning, EDA, model development, evaluation, and deployment.
- Built supervised and unsupervised learning projects using regression, classification, and clustering.
- Applied deep learning, NLP, Generative AI, REST APIs, Streamlit, and Flask.

Quantitative Research Intern (Simulation)

Jul 2026

JPMorgan Chase & Co.

- Analyzed price data and applied quantitative methods to price a commodity storage contract.
- Estimated probability of loan default using time-series and statistical analysis.
- Applied dynamic programming to bucket FICO scores for default prediction.

Data Analytics Intern (Simulation)

Jul 2026

Deloitte Australia

- Created a Tableau dashboard to visualize business metrics.
- Used Excel, A/B testing, and exploratory analysis to classify data and derive business insights.

PROJECTS

Customer Churn Prediction Python · Scikit-learn · XGBoost · Streamlit

2026

- Built an end-to-end churn pipeline with EDA, feature engineering, and SMOTE, achieving 92% accuracy and 0.91 ROC-AUC.
- Deployed real-time churn-risk predictions through an interactive Streamlit application.

Credit Card Fraud Detection Python · Scikit-learn · XGBoost

2026

- Analyzed 284,807 transactions with a 0.17% fraud rate; used SMOTE, undersampling, and feature engineering.
- Achieved 0.97 PR-AUC and reduced false negatives by 35% through threshold tuning.

House Price Prediction Python · Scikit-learn · XGBoost

2026

- Engineered 15+ features across 1,460 records and trained stacked regression models, achieving 0.91 R-squared.

Product Review Sentiment Analysis Python · NLTK · Scikit-learn

2026

- Processed 10,000+ reviews with tokenization and TF-IDF; trained classifiers achieving 89% accuracy.

EDUCATION

Bachelor of Computer Applications

Shambhunath Institute of Engineering & Technology · CGPA: 7.61/10

2022 – 2025
